ABSTRACT

The four volumes of the Alabama State Commission on Higher Education's 1988 Inventory of Academic Programs capsule an extensive variety of instructional programs offered by Alabama's 57 public institutions of higher education and the many private universities and colleges. Volume III focuses on public junior colleges and junior college divisions of community colleges as well as junior college linkage programs. It provides a summary view of all programs offered for credit and culminating in an academic award as of June 1, 1988. All programs are classified according to the National Center for Education Statistics' standard taxonomy, the Classification of Instructional Programs (CIP). Following a listing of Alabama's public junior/community colleges and junior college linkage programs, there is an explanation of abbreviations of common degree designations and a taxonomy of instructional programs. Two sections focus on an inventory of public junior and community colleges and an inventory of junior college linkage programs. The information is broken down by CIP/field of study/program title, institution, degrees offered, and accreditation/level. An appendix discusses accreditation and lists specialized accrediting/approving associations cited in the academic program inventory. (SM)

MEMORANDUM

TO: Users of the 1988 Inventory of Academic Programs

FROM: Joseph T. Sutton
Executive Director

The four volumes of the "1988 Inventory of Academic Programs" capsule an extensive variety of instructional programs offered by Alabama's 57 public institutions of higher education and the many quality private universities and colleges. Through the colleges and universities, the state of Alabama offers a wealth of educational opportunity.

The listing of each college and university offering a program is arranged according to the standard Classification of Instructional Programs (CIP) taxonomy.

The Inventory of Academic Programs is published annually by the Commission on Higher Education as a service to the state. We welcome your suggestions concerning improvements or changes that should be made to the publication.

I hope you find this year's edition useful. Please call on the Commission whenever we can be of assistance to you.

ACKNOWLEDGEMENTS

The staff of the Alabama Commission on Higher Education expresses its appreciation to the administrators of the public and independent institutions of higher education in Alabama and to the Alabama Department of Postsecondary Education (ADPE) for their assistance in providing and verifying the information contained in this report.

FOREWORD

The 1988 edition of the Inventory of Academic Programs provides a summary view of all programs offered for credit and culminating in an academic award offered by Alabama's public and private two and four-year colleges and universities as of June 1, 1988.

All data were submitted by the institutions and verified by the institutions and Commission staff. Program titles, levels of degrees offered, and accreditation status are listed for each program. A list of specialized accrediting agencies may be found in the appendix.

FORMAT. The inventory is published in four volumes: public senior institutions and branch campuses (Volume One); private senior institutions and branch campuses ; private junior colleges (Volume Two); junior college linkage programs; public junior and junior college divisions of community colleges (Volume Three); public technical colleges and technical college divisions of community colleges (Volume Four).

CLASSIFICATION OF INSTRUCTIONAL PROGRAMS. All programs are classified according to a standard taxonomy developed by the National Center for Education Statistics (NCES), A Classification of Instructional Programs (CIP). This classification permits institutions of higher education with diverse organizational structures to utilize a

variety of program and course titles. It accommodates modes of operation common to a variety of institutions and facilitates comparisons of information through a taxonomy designed to permit comparability among institutions nationwide. (A guide to CIP categories is included in the table of contents.)

Community, junior, and technical college certificate programs designed for completion in less than one academic year of full-time study (three quarter) are not included in the inventory. Also not included are programs that provide training through the Jobs Training Partnership Act (JTPA) program, a federally funded jobs training program for economically disadvantaged persons, persons in need of retraining, and older citizens.

Generic Categories. Discrete fields within the transfer or college parallel programs are not included in the inventory but are implicit in the award of the Associate in Arts (24.0101) and Associate in Science (24.0199) degrees. Generic categories are given also to linkage programs. CIP 30.9999 is assigned to the technical college linkage programs. These programs are joint ventures between the technical colleges and the junior/community colleges, in which the technical college grants a diploma in a field of specialization and the A.A.S. degree is granted by the junior/community college upon completion of a general studies component. 17.9999 is the CIP category assigned to the Junior College Linkage Programs, formerly known as the Regional Technical Institute Linkage Programs, offered by the state's public and private junior colleges and associate degree granting institutions. The

A summary of disciplinary categories in which degrees are offered by level follows:

	C	DIP	A	B	M	EdS	FP	D

JUNIOR COLLEGE LINKAGE PROGRAM

School of Health Related Professions

University of Alabama at Birmingham

Since 1969, the University of Alabama at Birmingham has operated a program for the training of allied health professionals to help alleviate the health manpower shortages of the medically underserved areas of the state. A part of the School of Health Related Professions, formerly known as the School of Community and Allied Health, the program is an educational consortium between the state's public and private junior colleges and associate degree granting institutions and the School of Health Related Professions. The program offers training in twelve allied health fields:

1. *Biomedical Equipment Technical*
2. *Medical Assistant*
3. *Medical Record Technician*
4. *Occupational Therapy Assistant*
5. *Radiographer*
6. *Radiation Therapy Technologist*
7. *Dietetic Technician*
8. *Emergency Medical Technician*
9. *Medical Laboratory Technician*
10. *Multiple Competency Clinical Technician*
11. *Physical Therapist Assistant*
12. *Respiratory Therapist*

Students in the Linkage attend a junior college or other associate degree granting institution near their homes for one year of prerequisite academic coursework. The second year is spent in Birmingham at the School of Health Related Professions in specialized training. After successfully completing the training, the students receive an associate degree from their junior college and

a certificate of completion from their particular program at UAB. Since all of the programs in allied health fields for which an accreditation mechanism exists have been accredited, each graduate is eligible to take the credentialing exam in his or her specialty.

The Junior College Linkage Program has been recognized by the National Commission on Allied Health Education and other prestigious groups as a national model for educational consortia.

APPENDIX

ACCREDITATION

Accreditation is the process whereby a nationally recognized agency or organization grants public recognition to a unit of an educational organization (school, institute, college, university, specialized program of study) indicating that it meets established standards of quality, as determined through initial and periodic self-study and evaluation by peers. The essential purpose of the accreditation process is to provide a professional judgment as to the quality of the educational institution or program(s) offered and to encourage continual improvement by the institution.

The process of accreditation in which schools submit their institution or program for an objective third party review is voluntary. All accrediting agencies have similar review procedures which generally include an institutional self-evaluation report and a site visitation report developed by a team of external reviewers.

While there are no federal or state restrictions on the establishment of accrediting agencies or associations, these organizations may be formally recognized by one of two bodies: 1) Council on Postsecondary Accreditation (COPA) and 2) the U.S. Department of Education (USDE).

The Council on Postsecondary Education (COPA) established in 1975 is the national, nongovernmental organization that works to foster and facilitate the role of accrediting bodies in promoting and ensuring the quality and diversity of American postsecondary education. To achieve these objectives, COPA recognizes, coordinates and reviews periodically the work of its member accrediting bodies.

The Secretary of Education, U.S. Department of Education, publishes a list of nationally recognized accrediting agencies and associations that the Secretary determines to be reliable authorities as to the quality of training offered by educational institutions or programs they accredit. The list is published for the purpose of determining institutional eligibility to receive funds under the Higher Education Act and other federal legislation.

Recognition by COPA and/or the USDE, however, is strictly voluntary, and some agencies which evaluate and "approve" or "accredit" programs may not seek recognition by either group, or may have sought such recognition and been denied. Some of these associations are viewed as legitimate. Others have been subject to criticism for conducting less than rigorous reviews.

A list of specialized accrediting/approving agencies which review programs in Alabama public and private institutions follows. Those agencies with COPA and/or USDE recognition have been so designated.

ALABAMA COMMISSION ON HIGHER EDUCATION

Created by the Legislature in 1969, the Commission is charged with the responsibility of coordinating public higher education in Alabama.

The Commission is devoted to representing the citizens' higher-education interests to the Governor and Legislature, while at the same time faithfully presenting the needs of the colleges and universities to the state.

In carrying out its responsbilities to approve new programs, review existing programs, formulate an annual budget recommendation, coordinate student financial aid programs and chart long-range goals for higher education, the Commission matches the strengths of the 57 institutions with the state's available financial resources.

To ensure the decisions are made with an awareness of the educational and financial consequences, the Alabama Commission on Higher Education provides data; responds to inquires; conducts studies; and offers other assistance on higher education matters to the Governor, the Legislature, the institutions and the citizens of Alabama.

The Commission is composed of 12 members - 10 appointed by the governor, one by the lieutenant governor and one by the speaker of the House - who serve staggered nine-year terms.
